ABSTRACT:

PROBLEM TO BE SOLVED: To provide an XML document storage/retrieval device capable of generating SQL inquiry according to RDB schema structure by reducing the storage cost for the XML document and the retrieval cost for the XML document.SOLUTION: XML-RDB mapping rule generation performing means 12 generates an XML-RDB mapping rule for storing XML document element not to be retrieved as it is from the XML schema description in an XML schema description language and the structural information of the XML document element to be retrieved. An XML document storage means 13 stores the XML document on the basis of the mapping rule, and an XML document retrieving means 14 generates retrieval, XML inquiry-SQL transformation rule to thereby efficiently store/retrieve the XML document.

  X   Applicant(s) submit herewith Form PTO 1449-Information Disclosure Citation together with copies, of patents, publications or other information of which applicant(s) are aware, which applicant(s) believe(s) may be material to the examination of this application and for which there may be a duty to disclose in accordance with 37 CFR 1.56.

The relevance of the attached references is that this is the closest art of which Applicant is aware. Applicant submits that the above references taken alone or in combination neither anticipate nor render obvious the present invention. Consideration of the foregoing in relation to this application is respectfully requested.

It is requested that the information disclosed herein be made of record in this application.

Respectfully submitted,

/David J. McKenzie/
